To whom it may concern

On-Site training cc

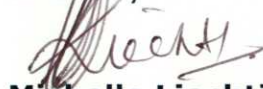

Murray & Roberts Steel has been making use of the services of On-Site Training since 2007.

Due to our specific needs in the company and the time constraints we have, On-site training has been a major asset to our staff training. We receive excellent service from them and they constantly assist us with special arrangements if the need arises.

We have a dedicated trainer who gets to know our staff and their needs.

On-site Training is a professional and detailed oriented company who will go out of its way to assist and meet our needs.

Sincerely

Michelle Liechti
