RE: On-Site Training

On-Site Training was introduced to our staff as our preferred training provider as from July 2008, and the training needs extended from Microsoft to Soft Skills Training. What was impressive from the beginning, is that On-Site is extremely flexible which suited our ever changing business and the coordinating of the training course from On-Site makes it a pleasure to schedule training from our side. From the moment that we have started dealing with On-Site, we have had nothing but professional service and good quality of training.

I would most definitely recommend On-Site training to be a training partner to any business that is serious about up skilling their staff.

Kind Regards,
